

SAFE SKATE PARK Etiquette Tips

Interacting properly in a park can keep you and others safe.

TIP 1: Signalling to take turns

Raise of the hand or motion of beginning the trick.

TIP 2: Telling people when you have a stray board

Yell out to your fellow boarders to announce when your board has come away from you – "Board!"

TIP 3: Taking turns

Looking for other people waiting to go and being patient if others came first.

TIP 4: Standing clear

Look at where it is clear to stand, for example stay clear of obstacles and pathways that run up to obstacles. On the deck of a ramp, stay back from the coping as not to interfere with anyone skating at the moment.

TIP 5: Flow

Familiarize yourself with the layout of the park and observe the patterns and flow that skaters use towards the obstacles. Try not to skate against/across this flow.

OO'S AND DON'TS of Skateboard Helmets

- Check for the safety sticker inside.
- No decorating helmets with paint or stickers.
- No cracks, dents, or damage.
- If in doubt, throw it out!

Wearing the right helmet is key for safety!

It's best to choose a helmet that has been ASTM F1492, Snell N-94, CEN or CE certified. Other helmets, such as bicycle helmets, are designed to take impact differently and offer different areas of protection.

Skateboarding helmets help skateboarders stay safe. ISCP/SKATZ encourages the use of elbow pads, knee pads and wrist guards to make for a better and safer skateboarding experience.

Respect Yourself, Respect Others, Respect the Park, SKATE SAFE
